

Amendments to the Drawings

Replacement drawing sheets 1-18 are attached at the end of this Amendment.
In these drawings minor corrections have been made as follows:

In Figure 10, the number for element 370 was moved to the left side, and a bracket added, to more clearly designate the entire group view display.

In Figure 13, the word "No" was added below decision block 432.

In Figure 17, the words "No" and "Yes" were added next to decision block 492.

Attachment: Replacement Sheets 1-18

Remarks

Claims 75-77 have been amended to clarify the claim scope and correct potential ambiguity discovered by Applicant prior to payment of the Issue Fee. Applicant respectfully asserts that no new matter has been included through these changes.

Applicant respectfully submits the following remarks and arguments with respect to new claims 78-90, which all depend from either allowed claim 36 or allowed claim 62, and which Applicant further requests be admitted because they are based on previously presented claims or element combinations disclosed in this case and represent subject matter patentable over all known prior art. Due to the Examiner's recent notice (in the Notice of Allowance) that the restriction requirement set forth in the Office Action of 7/27/2006 has been withdrawn, all of these claims are submitted now in order to avoid a potential double patenting rejection that might occur if these claims are presented in a subsequent continuation or divisional application. Claims 83-90 are intended to repeat the elements of dependent claims 75-82, but depend from independent claim 36 rather than independent claim 62.

Applicant submits herewith formal replacement drawings for the informal drawings submitted previously, which include minor changes as noted on page 8 above. Applicant respectfully requests that this Amendment and new claims be admitted into this case.

Respectfully submitted,

/Andrew T. Knowles/
